DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamada et al. (U.S. Patent No. 5,483,318).

Hamada et al. discloses a plurality of line sensors 16a-16g in Fig. 7, each island 16a-16g has a basic part line sensor and a reference part line sensor as seen in Fig. 4a; a plurality of monitor sensors are shown as M1-M4 and M1'-M4' for the line sensors of each island as seen in Fig. 10; and a control part shown as 52 seen in Fig. 16. The aforementioned drawings fairly convey to the ordinary workman that the auto focus AF sensor 17 is a single unit and thus all components therein are counted onto a "common board" or substrate.
